Q2 2026

Chemtrade Logistics Income Fund
(TSX: CHE.UN, OTCQX®: CGIFF)

Q2 2026 Earnings Review – August 12, 2026

CAUTION REGARDING FORWARD- LOOKING STATEMENTS

Certain statements contained in this presentation constitute forward-looking statements within the meaning of certain securities laws, including the Securities Act (Ontario). Forward-looking statements can be generally identified by the use of words such as “anticipate”, “continue”, “estimate”, “expect”, “expected”, “intend”, “may”, “will”, “project”, “plan”, “should”, “believe” and similar expressions. Forward-looking statements in this presentation describe the expectations of Chemtrade Logistics Income Fund (“Chemtrade”) and its subsidiaries as of the date hereof. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements for a variety of reasons, including without limitation the risks and uncertainties detailed under the “RISK FACTORS” section of Chemtrade’s latest Annual Information Form and the “RISKS AND UNCERTAINTIES” section of Chemtrade’s most recent Management’s Discussion & Analysis. Although Chemtrade believes the expectations reflected in these forward-looking statements and the assumptions upon which they are based are reasonable, no assurance can be given that actual results will be consistent with such forward-looking statements, and they should not be unduly relied upon. Except as required by law, Chemtrade does not undertake to update or revise any forward-looking statements, whether as a result of new information, future events or for any other reason. The forward-looking statements contained herein are expressly qualified in their entirety by this cautionary statement. Further information can be found in the disclosure documents filed by Chemtrade with the securities regulatory authorities, available on www.sedarplus.com.

One of the measures referred to in this presentation is Adjusted EBITDA, which is EBITDA modified to exclude only non-cash items such as unrealized foreign exchange gains and losses. Non-IFRS and other financial measure are fully defined in our MD&A.

Refer to the Appendix for additional notices of caution regarding forward-looking stat

TSX: CHE.UN, OTCQX®: CGIFF

Q2 2026 Consolidated Results

Positive Adjusted EBITDA contributions from (i) the Polytec acquisition in the WS segment and (ii) merchant and Regen acid in the ASP segment, were offset by lower selling prices for chlor-alkali products and lower volumes and selling prices for sodium chlorate

- The Canadian dollar remained unchanged relative to the U.S. dollar year-over-year with no impact on revenue and Adjusted EBITDA during Q2 2026. The biennial maintenance turnaround at the North Vancouver chlor-alkali plant negatively impacted Adjusted EBITDA in Q2 2026 by approximately \$7.0 million
- Excluding the impact of the turnaround at North Vancouver, Adjusted EBITDA in Q2 2026 decreased by \$3.7 million year-over-year

C\$ millions, except per unit metrics and ratios	Q2 2026	Q2 2025	Change (\$)	Change (%)
Revenue	578.7	496.7	82.0	16.5%
Net Earnings (Loss)	42.9	9.7	33.2	342.5%
Adjusted EBITDA ⁽¹⁾	127.3	138.0	(10.7)	(7.8)%
Cash Flows from Operating Activities	91.9	85.1	6.8	8.0%
Distributable cash after maintenance capital expenditures ⁽¹⁾	42.4	71.5	(29.1)	(40.7)%
DCPU ^{(1) (2)}	0.38	0.63	(0.25)	(39.5)%
LTM Payout ratio (%) ^{(1) (3)}	45%	33%	n/a	n/a
Net debt ⁽¹⁾	1,251.7	982.8	268.9	27.4%
Net debt to LTM Adjusted EBITDA ⁽¹⁾	2.55x	1.95x	n/a	n/a

(1) Adjusted EBITDA is a Total of segments measure; Distributable cash after maintenance capital expenditures is a non-IFRS financial measure and DCPU (Distributable cash after maintenance capital expenditures per unit) and Payout ratio are non-IFRS ratios. Net debt to LTM Adjusted EBITDA is a Capital management measure that includes Net debt, which is a non-IFRS financial measure. See Appendix for more information. (2) Based on weighted average number of units outstanding for the period. (3) Payout ratio for the last twelve months. The calculated year-over-year changes are based on non-rounded figures.

TSX: CHE.UN, OTCQX®: CGIFF

Acid and Sulphur Products (ASP)

Q2 2026 Results

Foreign Exchange Impact

- The Canadian dollar remained unchanged relative to the U.S. dollar year-over-year with no impact on revenue and Adjusted EBITDA during Q2 2026

ASP Revenue

- ASP Revenue in Q2 2026 was \$216.4 million, up by \$53.0 million or 32.4% year-over-year, primarily due to:
 - Higher selling prices for merchant acid, sulphur products, and Regen acid

ASP Adjusted EBITDA

- ASP Adjusted EBITDA in Q2 2026 was \$53.2 million, up by \$9.7 million or 22.3% year-over-year, primarily due to higher Adjusted EBITDA for merchant and Regen acid
 - Higher selling prices for merchant acid and Regen acid more than offset higher sulphur costs

Comparable Revenue (C\$ millions)

Comparable Adjusted EBITDA (C\$ millions)

TSX: CHE.UN, OTCQX®: CGIFF

Water Solutions (WS)

Q2 2026 Results

Foreign Exchange Impact

- The Canadian dollar remained unchanged relative to the U.S. dollar year-over-year with no impact on revenue and Adjusted EBITDA during Q2 2026

WS Revenue

- WS Revenue in Q2 2026 was \$181.9 million, up by \$42.8 million or 30.8% year-over-year, primarily due to:
 - Additional revenue from the Polytec acquisition
 - Higher selling prices for water solutions products

WS Adjusted EBITDA

- WS Adjusted EBITDA in Q2 2026 was \$37.0 million, up by \$4.3 million or 13.1% year-over-year, primarily due to additional Adjusted EBITDA from the Polytec acquisition
 - Higher input costs more than offset higher selling prices resulting in lower margins for water solutions products

Comparable Revenue (C\$ millions)

Comparable Adjusted EBITDA (C\$ millions)

Foreign Exchange Impact

- The Canadian dollar remained unchanged relative to the U.S. dollar year-over-year with no impact on revenue and Adjusted EBITDA during Q2 2026

North Vancouver biennial maintenance turnaround in Q2 2026

- The biennial maintenance turnaround at the North Vancouver chlor-alkali plant in Q2 2026 negatively impacted Adjusted EBITDA by approximately \$7.0 million

EC Revenue

- EC Revenue in Q2 2026 was \$180.4 million, \$13.8 million or 7.1% lower year-over-year, primarily due to:
 - Lower MECU netbacks for chlor-alkali products, and lower volume and lower selling prices for sodium chlorate
 - Higher contribution from Brazil provided a partial offset
- MECU netbacks declined by approximately \$350 with approximately 80% of the decline attributable to hydrochloric acid and chlorine

EC Adjusted EBITDA

- EC Adjusted EBITDA in Q2 2026 was \$61.2 million, \$30.9 million or 33.6% lower year-over-year
- Excluding the impact of the maintenance turnaround at North Vancouver, EC Adjusted EBITDA decreased by \$23.9 million or 26.0% year-over-year
 - The same factors that impacted EC revenue also impacted EC Adjusted EBITDA on a year-over-year basis

Comparable Revenue (C\$ millions)

Comparable Adjusted EBITDA (C\$ millions)

Foreign Exchange Impact

- Business results are presented on an unhedged basis. During Q2 2026, the Canadian dollar remained unchanged relative to the U.S. dollar year-over-year with no impact on results
- The related but offsetting realized gains and losses on Chemtrade's hedging program flow through corporate costs

Corporate Costs

- Corporate costs in Q2 2026 were \$24.1 million, down by \$6.2 million or 20.5% year-over-year
- Corporate costs decreased on a year-over-year basis primarily due to:
 - \$3.0 million of lower short-term incentive compensation costs; and
 - \$2.0 million of lower long-term incentive plan (LTIP) costs year-over-year

TSX: CHE.UN, OTCQX®: CGIFF

Balance Sheet and Capital Allocation

Net Debt / LTM Adjusted EBITDA⁽¹⁾

LTM Payout Ratio⁽¹⁾

Consistent focus on balanced capital allocation:

1) Invest in high-return, strategic growth opportunities

- Fully-funded growth strategy with internally-generated cash flow and revolver availability
 - Expect to invest \$40-\$60 million of Growth CapEx⁽¹⁾ in 2026
 - Invested \$11.4 million of Growth CapEx⁽¹⁾ in Q2 2026

2) Return of capital to unitholders

- Monthly distribution increases in Q1 2024 (10%), Q1 2025 (5%), Q1 2026 (4%)
- Distribution yield⁽²⁾ of 4% and an LTM payout ratio of 45%
- Repurchased 0.9 million units (\$14.9 million) in Q2 2026

3) Maintain a strong balance sheet through the economic cycle

- Net debt to LTM Adjusted EBITDA⁽¹⁾ of 2.55x at Q2 2026
- Available liquidity of ~\$410 million (~US\$289 million)
- Well-staggered maturity profile with a balance of floating and fixed rate debt

4) Optimize balance sheet to reduce sources of equity dilution

- In Q2 2026, completed the redemption of the 7.00% Convertible Debentures due June 30, 2028. Chemtrade has now removed all convertible debt instruments from its balance sheet
- Flexibility to extend and/or stagger maturity profile or lower debt capital cost of credit facility and/or notes

(1) Growth capital expenditures is a non-IFRS financial measure. Net debt to LTM Adjusted EBITDA is a Capital management measure that includes Net debt, which is a non-IFRS financial measure, and Adjusted EBITDA, which is a Total of segments measure. Payout ratio is a non-IFRS ratio and LTM Payout Ratio represents the Payout ratio for the last twelve months. See Appendix for more information. (2) Based on the closing price of Chemtrade units on August 10, 2026

2026 Guidance:

- Reaffirming 2026 Adjusted EBITDA guidance, as previously issued in January 2026, to range between \$485.0 million and \$525.0 million
- At midpoint, the 2026 Adjusted EBITDA implies 2026YE Net Debt to LTM Adjusted EBITDA of close to 2.5x and a Payout ratio of approximately 40%
- Due to geopolitical events, several of Chemtrade's products have seen significant price volatility during the first six months of 2026. While this volatility makes forecasting results for the remainder of 2026 challenging, Chemtrade is maintaining its 2026 Adjusted EBITDA guidance unchanged
- The timing of maintenance capex in 2026 is significantly different than 2025. During 2025, approximately two-thirds of annual maintenance capex was incurred during the second half of the year, whereas less than half is expected to be incurred in the second half of 2026.

* 2026 Adjusted EBITDA Guidance

9

	2026 Guidance	2025 Actual	Six Months ended Actual	
C\$ millions			June 30, 2026	June 30, 2025
Adjusted EBITDA ⁽¹⁾	\$485.0 – 525.0	\$507.4	\$240.8	\$258.0
Maintenance Capital Expenditures ⁽¹⁾	\$130.0 – \$140.0	\$123.5	\$71.4	\$43.9
Growth Capital Expenditures ⁽¹⁾	\$40.0 – \$60.0	\$48.2	\$17.2	\$18.2
Lease Payments	\$70.0 – \$80.0	\$70.0	\$35.4	\$34.8
Cash Interest ⁽¹⁾	\$65.0 – \$75.0	\$54.9	\$31.9	\$27.6
Cash Tax ⁽¹⁾	\$30.0 – \$40.0	\$31.0	\$19.7	\$18.2

Key Assumptions	2026 Guidance	2025 Actual	2024 Actual
North American MECU sales volumes	180,000	170,000	172,000
2026 realized MECU Netback change over 2025 per MECU*	CAD (\$275)	N/A	N/A
Average CMA ⁽²⁾ NE Asia caustic spot price index per tonne ⁽³⁾	US\$370	US\$435	US\$385
North American sodium chlorate production volumes (MTs)	260,000	273,000	270,000
USD to CAD average foreign exchange rate	1.375	1.397	1.370
Long Term Incentive Plan costs (C\$ millions)	\$18.0 – \$25.0	\$29.4	\$23.3

(1) Adjusted EBITDA is a Total of segments measure. Maintenance capital expenditures, Cash interest and Cash tax are Supplementary financial measures. Growth capital expenditures is a non-IFRS financial measure. See Appendix for more information.

(2) Chemical Market Analytics by OPIS, a Dow Jones Company, formerly IHS Markit Base Chemical.

(3) Average CMA NE Asia caustic spot price is the average for the four quarters ending with the third quarter of the year as pricing is largely based on a one quarter lag.

“Vision 2030” targets for unitholder returns:

- Targeted growth in Adjusted EBITDA and Distributable Cash of 5-10% per year, resulting in:
\$550 million – \$600 million of mid-cycle Adjusted EBITDA by 2030
- Growth on a per unit basis supplemented by reduced units outstanding via buybacks

Key Drivers of Total Unitholder Returns:

Growth in Distributable Cash

Business Improvements

- Continued focus on operational and commercial excellence
- Assumes softening in market fundamentals for some products

Organic Growth

- Targeted returns on investment of 15-20%+
- Primary focus on water chemicals and Ultrapure acid
- Includes potential acquisition synergies

External Growth

- Targeting acquisitions with annual EBITDA of \$10-\$50M
- Must fit strategically and be financially accretive
- Expected to be debt-financed; target leverage ~2.5x

Unit Repurchases

- Driving incremental unitholder value on a per unit basis
- Attractive use of capital given Chemtrade's current valuation

Distributions

- Current monthly distribution level is sustainable
- Opportunity to increase distributions as earnings and cash flow grow

1) DCPU (Distributable cash after maintenance capital expenditures per unit) non-IFRS ratios. See Appendix for more information.

Maintenance Turnarounds

- 2026 is expected to be maintenance heavy for acid assets

Pricing considerations

- Sulphur prices have increased significantly versus historical levels and remain elevated. Chemtrade assumes that prices soften slightly but remain above historical levels in H2 2026

Regen acid

- Demand is expected to remain stable moving forward, with U.S. refinery operating rates steady and historically seeing limited impact in a typical recession

Merchant acid

- Risk-sharing agreements with suppliers and customers mitigate significant pricing and input cost movements

Ultrapure acid (UPA)

- Strong growth outlook, supported by semiconductor industry on-shoring and capacity expansion in North America
- Chemtrade is the UPA industry leader for the semiconductor industry in North America
- Construction and start-up of the Cairo, OH UPA plant was completed in 2025 alongside quality improvement upgrades to the Tulsa, OK UPA plant. Chemtrade is actively progressing through certification and commercialization with several customers and remains well-on track to achieve targets throughout 2026

Utilization of U.S. Refinery Capacity (% , weekly)

Source: U.S. Energy Information Administration

Tampa Contract Sulphur Price (US\$/LT, quarterly)

Source: Green Markets / Bloomberg

12

Near-Term Considerations

- Raw material costs have been increasing significantly in alum. While Chemtrade has been successfully passing through these higher costs over time, it may see some margin pressure in the interim and/or if input costs continue to rise. Sulphuric acid is a key raw material for Water Chemicals and higher costs could pressure margins until contracts are renewed / renegotiated
- Demand expected to remain strong as water chemicals are largely non-discretionary given their use in cleaning and purifying drinking water
- Integration of Polytec is progressing smoothly while Thatcher Group volumes are now incorporated into our network

Favourable Long-Term Outlook

- Global demand expected to increase at a 5% CAGR (2023-2033), supported by secular tailwinds including increasing consumption, tightening regulations, etc.
- Continue to target high-return organic growth projects, including additional capacity expansions and investments in higher growth specialty products
- Chemtrade is one of the largest coagulants suppliers in North America to both private and municipal markets

Water Chemicals

5% CAGR (2023 – 2033)

Expected growth in **global water treatment chemicals market**

US\$12Bn

2023 North American chemical **water treatment market**

Macro Drivers

Population Growth

Industrial Growth

Tightening Environmental Regulations

Extreme Weather (Droughts)

Chemtrade Differentiators

Greater emphasis on building and maintaining water treatment facilities

Chemtrade is one of the largest coagulants suppliers

Local gov'ts hiring private sector to address complex water standards

Chemtrade is a leading provider to private and municipal markets

Chemical supplier proximity to water treatment facilities is crucial

Chemtrade has a large footprint of production facilities

North Vancouver Chlor-Alkali Facility Update

- On July 20, 2026, Chemtrade's rezoning application received final adoption during the meeting of the District of North Vancouver Council (the "District"). The adoption is the final step in the rezoning application process
- On July 29, 2026, a petition for judicial review was filed in the Supreme Court of British Columbia seeking to set aside the District's July 20, 2026 decision to adopt the bylaw amendment. Chemtrade disputes the legal and factual basis of the petition, denies the allegations made, intends to be added as a respondent and a party to the proceeding, and will vigorously oppose the relief sought
- Chemtrade is continuing to engage with the Port to finalize its land lease for a portion of the Facility situated on Port lands. In 2025, Chemtrade and the Port entered into a non-binding letter of intent (the "LOI") outlining terms of a new 20-year agreement
- In order to comply with the LOI and the covenants agreed with the District, multi-year capital investments are required, including new chlorine liquification facilities on the portion of land owned by Chemtrade and improvements designed to further enhance the strong safety infrastructure of the Facility. A preliminary assessment of the multi-year capex required is estimated at an investment range of \$75 million to \$125 million.

Caustic Soda

- Northeast Asia (NEA) caustic soda index pricing was ~US\$35 (8%) lower year-over-year in Q2 2026 at ~US\$382 per tonne. In Q3 to-date, the NEA caustic soda price has averaged ~US\$330 per tonne. Industry forecasts expect Taiwan contract to begin recovering in late 2026 with continued improvement into 2029
- For the second half of 2026, Chemtrade's guided pricing assumes a NE Asia index price of US\$370 per tonne, approximately US\$65 per tonne lower compared to 2025

Chlorine and Hydrochloric Acid (HCl)

- Chlorine has seen a relatively steady market in the seasonally stronger warmer months
- HCl demand has strengthened due to geopolitical impacts on fracking activity. HCl is also seeing higher demand from other industries as a substitute for sulphuric acid

Sodium Chlorate

- Volumes expected lower year-over-year in 2026 alongside slightly moderating pricing

Source: CMA (Chemical Market Analytics by OPIS, a Dow Jones Company, formerly IHS Markit Base Chemical)

	WTI Oil Price	Canadian Rig Count
2022 Average	US\$95/bbl	174
2023 Average	US\$78/bbl	176
2024 Average	US\$77/bbl	187
2025 Average	US\$65/bbl	176
LTM-July 2026	US\$73/bbl	181

CHEMTRADE

TSX: CHE.UN, OTCQX®: CGIFF

Growth Investments

Organic Growth Investment in 2026

- Chemtrade plans to allocate \$40 million - \$60 million for Growth capital expenditures to support organic growth projects in 2026, compared to approximately \$48 million in 2025
- Focus areas of investment in 2026 include expansion of water solutions projects

Water Solutions Projects

- Chemtrade is expanding capacity for products seeing strong demand growth. These projects are typically smaller in size, but collectively they add up to a material earnings contribution
- Expansion / Growth of specialty water chemicals projects is progressing in-line with expectations

Ultra-Pure Acid Expansion and Upgrade Projects

- Construction and the start-up process of the Cairo, Ohio UPA project was completed in 2025 alongside quality improvement upgrades to the Tulsa, Oklahoma UPA plant
- Chemtrade is actively progressing through certification and commercialization with several customers and remains well-on track to achieve targets throughout 2026

External Growth

- Integration of the November 2025 Polytec acquisition (US\$150 million) is progressing well. Volumes acquired from the Thatcher Group in May 2025 (US\$30 million) are incorporated into our network
- Chemtrade seeing initial benefits and earnings contribution alongside execution on growth projects

Highlights

Appendix

Chemtrade continues to actively monitor developments surrounding tariff developments to swiftly respond to any potential impacts and/or opportunities

- To date, excluding FX, Chemtrade's products have not been directly impacted, given **all of Chemtrade's products are CUSMA-compliant**

We are closely monitoring the North American trade situation and will reassess in the event of material changes. Chemtrade remains optimistic that it will be able to work with its customers and suppliers to manage any additional costs, owing to:

- ✓ All of Chemtrade's products are CUSMA compliant
- ✓ No U.S. imports from Mexico and limited imports from China
- ✓ U.S. customers are largely served by plants in the U.S
- ✓ New or increased tariffs on Chemtrade's products might be passed on

Chemtrade products exported to the U.S. from Canada:

Sodium Chlorate

- Canada is a net exporter of chlorate to the U.S., supplying ~50% of the U.S. industry
- Chemtrade's plant located in Brandon, Manitoba has a significant cost advantage from low-cost, renewable hydroelectric power

Chlorine

- Chlorine is an essential chemical for disinfection and is used by U.S. municipalities to treat drinking water
- Chemtrade's plant located in North Vancouver, B.C. has a cost advantage from low-cost, renewable hydroelectric power

Merchant Acid

- Chemtrade markets merchant acid generated by smelters in Canada under risk-shared contracts that mitigate volatility

Resilient Business Model

Diversified end-market exposure, with a resilient product portfolio offering both defensiveness and growth

Significant regional market share across product portfolio with several multi-year tailwinds

Strong Total Unitholder Return through growing cashflow, unit repurchases, and distributions

Attractive Growth

Compelling organic growth opportunities across the business including Water Chemicals and Ultrapure Acid

Earnings and cash flows have taken a step-change, with a 4-year Adjusted EBITDA CAGR of 16% (2021-2025)

Targeted growth to drive mid-cycle Adjusted EBITDA to \$550-600 million into 2030

Strong Execution

2026 expected to be a Near-Record Year for Chemtrade, based on mid-point of Adjusted EBITDA guidance

Commercial Excellence and Profitability initiatives contributing to margins

Operational Excellence and Reliability initiatives driving improved plant performance

Strong Balance Sheet

Strong balance sheet (2.55x Net debt to LTM Adjusted EBITDA⁽²⁾) and cash flow generation offer financial flexibility

Well-staggered maturity profile with balance of floating and fixed rate debt

Disciplined capital allocation and generating long-term unitholder value a core focus

Returning Capital to Unitholders

Track-record of paying distributions; increased 10% in January 2024, 5% in January 2025, 4% in January 2026

4% distribution yield⁽¹⁾ and LTM Payout ratio of 45%⁽²⁾, highlight distribution's sustainability

Strategic use of NCIB offers another lever to drive unitholder value, given Chemtrade's attractive valuation

Corporate Leadership

Proactive chemical industry leader in community engagement, corporate governance, employee stewardship, and sustainability

(1) Based on the closing price of Chemtrade units on August 10, 2026. (2) Payout ratio is non-IFRS ratio. Net debt to LTM Adjusted EBITDA is a Capital management measure that includes Net debt, which is a non-IFRS financial measure, and is shown as of the end of Q2 2026. See Appendix for more information.

Highlights

Appendix

Chemtrade's Footprint Transcontinental Reach

Acid & Sulphur Products (ASP)

- 2 facilities in Canada and 8 in the United States
- Major Regen acid facilities are pipeline connected to customer

Water Solutions (WS)

- 10 facilities in Canada and 37 in the United States
- Strategic locations near customers create a barrier to entry given transportation costs

Electrochemicals

- Facilities in Canada and South America (Brazil)
- State-of-the-art facilities utilizing membrane cell technology
- Strategically located with access to stable and regulated low-cost hydro-electric power

CHEMTRADE

TSX: CHE.UN, OTCQX®: CGIFF

Acid and Sulphur Products (ASP) Segment

Sulphuric Acid (H₂SO₄) Products

Non-Acid Products

Regen Acid

Gasoline production

Ultrapure Acid

Semiconductor manufacturing,
specialty batteries,
and lab chemistry

Merchant Acid

Wood pulp, industrial chemicals, car
batteries, steel production, water
treatment, mining

Sulphur, Sulphides, SHS, SBS, Sodium Nitrite, etc.

Sulphuric acid, food preservation, metal
refining & finishing, mining, pulp & paper

Acid Products

- Regen acid is closely tied to refinery utilization, which is recession resistant. Regen has long-term contracts with input cost pass-throughs. Chemtrade's facility footprint provides a competitive advantage as its largest facilities are pipeline-connected to customers that favour proximity
- Merchant acid has risk-sharing agreements with suppliers and customers. Half of the merchant sulphuric acid is manufactured internally, with the balance sourced through long-term contracts
- Ultrapure acid has high barriers to entry (rigorous product qualification process) and strong end-market tailwinds (onshoring and digitization)

Leading Ultrapure acid supplier to semiconductors

#2 Regen acid supplier to refineries

Top 3 Merchant acid supplier

Non-Acid Products

- Chemtrade's non-acid products include primarily sulphur and sulphur-related products but also others such as sodium nitrite
- Sulphur is acquired in molten form and used as a raw material or further processed into prills. Pricing varies based on regional market conditions and the Tampa "Green Markets" posting, an industry pricing index. Most of our agreements feature netback, back-to-back, and other risk mitigation provisions to protect cash flow
- Sulphides, SHS, SBS are niche products with end markets ranging from mining and refining to the pulp & paper industry
- Sodium Nitrite is used in a wide range of industrial processes and food preservation. Chemtrade is the only North American manufacturer of sodium nitrite as a primary product and benefits from U.S. trade protection actions

Highlights

Appendix

Water Products and Services

Alum, Ferric

Municipal and industrial water treatment

ACH, PACI

Specialized municipal and industrial water treatment

Al+Clear®

Poultry litter management

Services

Value-added solutions for municipal and food / industrial water treatment

Water Chemicals

- Inorganic coagulants are used to clean and purify drinking water and are non-discretionary
- Municipal customers have fixed-price annual contracts while industrial customers typically have multi-year contracts
- Facility footprint of 40+ locations provides a competitive advantage as customers favor proximity

Poultry Litter Treatment

- Branded line of products (select ones patented) for litter management in the poultry industry with custom applicators that provide consistent and uniform treatment

Water Services

- Following the acquisition of Polytec in November 2025, Chemtrade provides value-added water solutions to the food / industrial and municipal markets

#1 Alum supplier to drinking water plants

#2 Supplier of water coagulants

#2 in poultry litter treatment

*Management estimates for North American Market

Electrochemicals

Caustic Soda (NaOH)

Pulp & paper, soaps & detergents, aluminum, oil & gas, lithium-ion batteries, and chemical processes

Chlorine (Cl₂)

Water treatment, chemical processes (mainly PVC production), production of other chemicals

Hydrochloric Acid (HCl)

pH adjuster in water treatment, oil & gas drilling, and steel manufacturing

Sodium Chlorate (NaClO₃)

Pulp & paper bleaching

Chlor-alkali (Caustic soda, Chlorine, and Hydrochloric Acid)

- Facilities possess superior and more efficient membrane cell technology
- Cost-advantaged access to electricity relative to competitors globally. Global geopolitical tensions may boost North American demand and further support the energy cost advantage
- EC supplies over 70% of Western Canada's liquid chlorine and approximately 40% of available chlorine production in Canada. Chlorine is used in the disinfection of municipal drinking water and wastewater
- Leading regional supplier of caustic soda in Western Canada. A significant portion of West Coast caustic soda volumes are imported resulting in the Northeast Asia spot price influencing market price

Sodium Chlorate

- Chemtrade's Brandon, Manitoba sodium chlorate plant is the largest and one of the lowest-cost sodium chlorate plants globally

#1 Chlor-alkali producer in Canada

Top 3 Sodium chlorate supplier in North America

*Management estimates for North American Market

Caustic Soda Price

Non-IFRS Financial Measures and Ratios

Non-IFRS financial measures are financial measures disclosed by an entity that (a) depict historical or expected future financial performance, financial position or cash flow of an entity, (b) with respect to their composition, exclude amounts that are included in, or include amounts that are excluded from, the composition of the most directly comparable financial measure disclosed in the primary financial statements of the entity, (c) are not disclosed in the financial statements of the entity and (d) are not a ratio, fraction, percentage or similar representation. Non-IFRS ratios are financial measures disclosed by an entity that are in the form of a ratio, fraction, percentage or similar representation that has a non-IFRS financial measure as one or more of its components, and that are not disclosed in the financial statements of the entity.

These non-IFRS financial measures and non-IFRS ratios are not standardized financial measures under IFRS and, therefore, are unlikely to be comparable to similar financial measures presented by other entities. Management believes these non-IFRS financial measures and non-IFRS ratios provide transparent and useful supplemental information to help investors evaluate our financial performance, financial condition and liquidity using the same measures as management. These non-IFRS financial measures and non-IFRS ratios should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with IFRS.

The following slides outline our non-IFRS financial measures and non-IFRS ratios, their compositions, and why management uses each measure. It includes reconciliations to the most directly comparable IFRS measures. Except as otherwise described herein, our non-IFRS financial measures and non-IFRS ratios are calculated on a consistent basis from period to period and are adjusted for specific items in each period, as applicable.

Distributable cash after maintenance capital expenditures

Most directly comparable IFRS financial measure: Cash flows from operating activities

Definition: Distributable cash after maintenance capital expenditures is calculated as cash flows from operating activities less lease payments net of sub-lease receipts, maintenance capital expenditures incurred, including unpaid amounts, and adjusting for cash interest and current taxes, and before decreases or increases in working capital.

Why we use the measure and why it is useful to investors: It provides useful information related to our cash flows including the amount of cash available for distribution to Unitholders, repayment of debt and other investing activities

Distributable cash after maintenance capital expenditures per unit

Definition: Distributable cash after maintenance capital expenditures per unit is calculated as distributable cash after maintenance capital expenditures divided by the weighted average number of units outstanding.

Why we use the measure and why it is useful to investors: It provides useful information related to our cash flows including the amount of cash available for distribution to Unitholders, repayment of debt and other investing activities.

Payout ratio

Definition: Payout ratio is calculated as Distributions declared per unit divided by Distributable cash after maintenance capital expenditures per unit.

Why we use the measure and why it is useful to investors: It provides useful information related to our cash flows including our ability to pay distributions to Unitholders.

Non-IFRS Financial Measures and Ratios

Net debt

Most directly comparable IFRS financial measure: Total long-term debt, Convertible Debentures, lease liabilities, and long-term lease liabilities, less cash and cash equivalents

Definition: Net debt is calculated as the principal of long-term debt, the principal value of Convertible Debentures, lease liabilities and long-term lease liabilities, less cash and cash equivalents

Why we use the measure and why it is useful to investors: It provides useful information related to our aggregate debt balances

Non-IFRS Financial Measures and Ratios

Growth capital expenditures

Most directly comparable IFRS financial measure: Capital expenditures

Definition: Growth capital expenditures are calculated as Capital expenditures less Maintenance Capital expenditures, plus investments in a joint venture. These include unpaid amounts at each reporting period.

Why we use the measure and why it is useful to investors: It provides useful information related to the capital spending and investments intended to grow earnings

C\$ millions	Three months ended		Six months ended		Twelve months ended
	June 30, 2026	June 30, 2025	June 30, 2026	June 30, 2025	December 31, 2025
Capital expenditures	\$ 54.2	\$ 39.5	\$ 100.1	\$ 86.5	\$ 176.6
Net change in accounts payable and accrued liabilities related to capital expenditures	-	(1.7)	(11.5)	(24.4)	(4.9)
Capital expenditures, including unpaid amounts	\$ 54.2	\$ 37.8	\$ 88.6	\$ 62.1	\$ 171.7
Add (Less):					
Maintenance capital expenditures	(42.8)	(26.8)	(71.4)	(43.9)	(123.5)
Non-maintenance capital expenditures	11.4	11.0	17.2	18.2	48.2
Growth capital expenditures	\$ 11.4	\$ 11.0	\$ 17.2	\$ 18.2	\$ 48.2

Capital management measures are financial measures disclosed by an entity that (a) are intended to enable an individual to evaluate an entity's objectives, policies and processes for managing the entity's capital, (b) are not a component of a line item disclosed in the primary financial statements of the entity, (c) are disclosed in the notes of the financial statements of the entity, and (d) are not disclosed in the primary financial statements of the entity.

Net debt to LTM Adjusted EBITDA

Definition: Net debt to LTM Adjusted EBITDA is calculated as Net debt divided by LTM Adjusted EBITDA. LTM Adjusted EBITDA represents the last twelve months Adjusted EBITDA.

Why we use the measure and why it is useful to investors: It provides useful information related to our debt leverage and our ability to service debt. We monitor Net debt to LTM Adjusted EBITDA as a part of liquidity management to sustain future investment in the growth of the business and make decisions about capital.

Total of segments measures are financial measures disclosed by an entity that (a) are a subtotal of two or more reportable segments, (b) are not a component of a line item disclosed in the primary financial statements of the entity, (c) are disclosed in the notes of the financial statements of the entity, and (d) are not disclosed in the primary financial statements of the entity.

The following slide provides an explanation of the composition of the Total of segments measures.

Supplementary financial measures are financial measures disclosed by an entity that (a) are, or are intended to be, disclosed on a periodic basis to depict the historical or expected future financial performance, financial position or cash flow of an entity, (b) are not disclosed in the financial statements of the entity, (c) are not non-IFRS financial measures, and (d) are not non-IFRS ratios.

The following provides an explanation of the composition of those Supplementary financial measures.

Maintenance capital expenditures

Represents capital expenditures that are required to sustain operations at existing levels and include major repairs and maintenance and plant turnarounds, including unpaid amounts at each reporting period.

Non-maintenance capital expenditures

Represents capital expenditures that are: (a) pre-identified or pre-funded, usually as part of a significant acquisition and related financing; (b) considered to expand the capacity of our operations; (c) significant environmental capital expenditures that are considered to be non-recurring; or (d) capital expenditures to be reimbursed by a third party, including unpaid amounts.

TSX: CHE.UN, OTCQX®: CGIFF

Supplementary Financial Measures

Cash interest

Represents interest expense related to long-term debt, interest on Convertible Debentures, pension interest expense and interest income.

Cash tax

Represents current income tax expense.

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

Certain statements contained in this presentation constitute forward-looking statements and forward looking information within the meaning of certain securities laws, including the Securities Act (Ontario). Forward-looking statements can be generally identified by the use of words such as “anticipate”, “continue”, “estimate”, “expect”, “expected”, “intend”, “may”, “will”, “project”, “plan”, “should”, “believe” and similar expressions. Specifically, forward-looking information in this presentation include statements respecting certain future expectations about: Chemtrade’s expectation to invest \$40-60 million of Growth Cap Ex in 2026; its expectation that it has flexibility to extend and/or stagger maturity profiles or lower debt capital costs of credit facility and/or long term notes; Chemtrade’s expected Adjusted EBITDA range for 2026 and implied payout ratio; the expected 2026 stated maintenance capital expenditures, growth capital expenditures (including allocation of such amounts), lease payments, cash interest and cash tax; and the expected Net debt to Adjusted EBITDA ratio at the end of 2026; expectations related to caustic soda pricing, North American MECU sales volumes and netbacks, sodium chlorate pricing and North American volumes, C\$/US\$ exchange rate, and long term incentive plan costs; its expectations with respect to its “Vision 2030” targets of unitholder returns, 5 to 10% annual growth in mid-cycle Adjusted EBITDA; its expectation that Adjusted EBITDA growth will occur on a per unit basis supplemented by reduced units outstanding via buybacks; its expected targeted returns for investment between 15-20%, with a focus on water chemicals and ultrapure acid; its intention to target acquisitions with annual EBITDA between \$10-50M; its anticipated drivers of growth (2025-2030), including existing business improvements (continued focus on commercial and operational excellence), organic growth (focusing on water chemicals and ultrapure acid) and external growth (targeting acquisitions with EBITDA between \$10-\$50M, the expectation that such acquisition will be debt financed, its targeted leverage of <2.5X; Chemtrade’s expectation that it will be able to work with its customers and suppliers to manage additional costs of a changing tariff environment and CUSMA negotiations; Chemtrade’s expectation that demand remains strong in the water chemicals portfolio; its expectation that it will be able to successfully pass through higher raw material costs to customers over time, but that it may see some short-term margin pressure; Chemtrade’s expectation that global water treatment chemicals market demand is to increase at a 5% CAGR between 2023 and 2033; the expectation of 2026 being a maintenance-heavy year for ASP assets; the assumption that sulfur prices soften but remain above historical levels in H2/2026; our expectation that Chemtrade remains well positioned to achieve certification and commercial targets in its UPA business in 2026; its expectation that margin pressure will remain in the Water Segment until raw material costs can be renewed/renewed; Chemtrade’s expectation that demand for water treatment chemicals will remain strong as water chemicals are largely non-discretionary given their use in cleaning and purifying drinking water; Chemtrade’s expectation that the Taiwan contract to begin recovering in late 2026 with continued improvement into 2029; Chemtrade’s assumption that chlorine market will remain relatively steady in the seasonably stronger warmer months; Chemtrade’s expectation that HCL demand will strengthening due to geopolitical impacts on fracking and the potential for increased demand from the mining and steel industries as a substitute for sulfuric acid; its expectation that the multi-year capex required for its liquid chlorine project is estimated at an investment range of \$75 million to \$125 million Chemtrade’s intention to continue to engage with the Port to finalize its land lease for a portion of the Facility situated on Port lands; Chemtrade’s intention and ability to be added as a respondent and party to the Petition Proceedings; Chemtrade’s intention and ability to vigorously oppose the relief sought the Petition.

Forward-looking statements in this presentation describe the expectations of Chemtrade Logistics Income Fund (“Chemtrade”) and its subsidiaries as of the date hereof. With respect to the forward-looking information contained in this presentation, Chemtrade has made certain assumptions regarding, among other things: there being no significant disruptions affecting the operations of Chemtrade and its subsidiaries, whether due to labour disruptions, supply disruptions, power disruptions, transportation disruptions, damage to equipment or otherwise; the ability of Chemtrade to sell products at prices consistent with current levels or in line with Chemtrade’s expectations; the ability of Chemtrade to obtain products, raw materials, equipment, transportation, services and supplies in a timely manner to carry out its activities and at prices consistent with current levels or in line with Chemtrade’s expectations; the timely receipt of required regulatory approvals; the cost of regulatory and environmental compliance being consistent with current levels or in line with Chemtrade’s expectations; and the performance of the global economy as expected. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements for a variety of reasons, including without limitation the risks and uncertainties detailed under the “RISK FACTORS” section of Chemtrade’s latest Annual Information Form and the “RISKS AND RISK MANAGEMENT” section of Chemtrade’s most recent Management’s Discussion & Analysis. Although Chemtrade believes the expectations reflected in these forward-looking statements and the assumptions upon which they are based are reasonable, no assurance can be given that actual results will be consistent with such forward-looking statements, and they should not be unduly relied upon. Except as required by law, Chemtrade does not undertake to update or revise any forward-looking statements, whether as a result of new information, future events or for any other reason. The forward-looking statements contained herein are expressly qualified in their entirety by this cautionary statement. Further information can be found in the disclosure documents filed by Chemtrade with the securities regulatory authorities, available on www.sedarplus.com.

Non-IFRS measures referred to in this presentation include Adjusted EBITDA and Net Debt to LTM Adjusted EBITDA. Non-IFRS and other financial measure are fully defined in our MD&A.
